FRONTEND WEB DEVELOPER

DESCRIPTION

I am a highly motivated Frontend Web Developer.

On the Frontend, I have experience building re-usable components and design. Single-handedly designed and developed some web-app using react, and other web tools. I've also worked on a logistics solution "Errandlr" (still work there), where I created beautiful, responsive, and world-class user interfaces with new web technologies like tailwind CSS, react typescript, react query as a substitute for react-redux, and thunk or saga among others, I have experience writing production code with redux-thunk

Building a good user experience is very important and has been my priority in web development, I create elegant and resilient pixel-perfect designs. I have also done some freelance work (kadoshiservices.com) I strongly believe in collaborating and bringing out the best in one another.

On the backend, I have experience with node js and the express framework, at mybukka services, which is an e-commerce solution, I worked on the backend where I build the API using tools like express, mongoose, Mongo DB for database alongside others up to date tools. like mjml for emailing. This whole chunk of experience has given me the standing as a full-stack developer.

EDUCATION

02-2020 - 12-2020	**Full Stack Web Development** *Hack Academy.*
HND - presently	**Computer Science** *Kwara State Polytechnic*

Work Experience

07/2020 - 09/2020	**FullStack Developer (Intern Part Time)** *Hack Academy (hackacademy.com.ng)* I worked on the hack academy website, working with google forms for easy registration and collection of details from aspiring students. I contributed by fixing UI bugs and creating clean pages from Figma and adobe xd illustrations. I also helped in tutoring new intakes to the academy on CSS, HTML, javascript, bootstrap, React among many other things.
07/2020 - 12/2020	**Frontend Develop (Intern Part Time)** *mybukka* Here I worked on an eCommerce platform "mybukka.com" refactoring their components and creating clean and beautiful user interface and experience with the help of tools like SCSS, CSS, styled-components, bootstrap, among others. Also writing integration logic with tools like redux, thunk, and redux persist
01/2021 - Present	**React Frontend Developer** *ErrandLr (https://errandlr.com/*

Here I built complex design using react and react typescript, tailwind CSS, styled-components, SCSS, CSS, modern tools like tools for validation (Formik and yup), google ReCaptcha, workbox, GoogleMaps, react query as a substitute for redux and many other modern react and non react tools.

Soft Skills

Communication, Strong Work Ethics, Highly Motivated, Problem-solving, Positive attitude, Team Work and good Team Spirit, Versatility.

Interests and Hobbies

Learning on Youtube, researching online, movies, meditating, music.

Hard Skills

React, Node js, Express, Socket.io React Typescript, Redux, Redux saga and Redux Thunk, Nextjs, Vuejs Javascript, es6, css, Bootstrap, Tailwind css, Chakra ui, Firebase, Mongo Atlas, Docker, git & github, RESTful api, Axios, Figma.
