PERSONAL PROFILE

I'm a detail-oriented full-stack developer with extensive experience with web technologies. My experience in software designing and development for a variety of industries in the last three years has availed me of the ability to refactor spaghetti code into solid, reusable, testable, and trustworthy software programs, and also given me hands-on experience designing and developing a variety of visually appealing User Interface / User Experience (UI/UX) applications while also deploying an array of web applications. Understanding client requirements and communicating the progress of projects are my core values in achieving long-lasting business relationships.

I possess a penchant for perfection and a genuine love for technology that leads me to leisurely play around with different programming languages as I continue my strive to learn all that I can (with enthusiasm) just so that I can get as close as I can to being a great software developer. Lest I forget, I also really love creating content!

CORE SKILLS

1. Broad development knowledge including JavaScript, Typescript, MERN (MongoDB, Express, React.js, Node.js) stack, Vue.js, and Angular.
2. Micro-frontend, Next.js,
3. HTML5, CSS3, SASS, Tailwindcss, Material-UI, Bootstrap, Chakra UI.
4. Distributed version control (Git), CircleCI, Docker.

SECONDARY SKILLS

Python, Flutter, MySQL)

PROJECTS

1. Kadosi Service (React.js, Node.js) Employment (**May 2022- May 2023**)

2. Errandlr (React.js, Node.js) Logistics (**April 2021 – April 2022**)

3. Hackacademy (React.js, Node.js) Education (**February 2020 – September 2020**)

PROFESSIONAL EXPERIENCE

1. **Frontend Developer –** Kadoshi Services (**May 2022- May 2023**)

   ⇨ Handling the day-to-day tasks by utilizing cutting-edge technology, software development best practices, and a touch of creativity.

   ⇨ Writing reusable React components.

2. **Frontend Developer –** Errandlr (**April 2021 – April 2022**)

   ⇨ Handling the day-to-day tasks by utilizing cutting-edge technology, software development best practices, and a touch of creativity.

   ⇨ Writing reusable React components.

3. **Full stack Developer –** BukkaEats. **(October 2020 - March 2021)**

   ⇨ Building RESTful API endpoints with proper documentation.

   ⇨ Building reusable, testable, scalable, and responsive applications with React SSR (Server-Side Rendering), Redux, and Material-UI.

4. **Software Engineer -** Hackacademy. **(February 2020 - September 2020)**

   ⇨ Manage integration between UI/UX, frontend, and backend developers.

   ⇨ Worked on feature integrations, feature design, environment configuration, and bug fixes.

EDUCATION & QUALIFICATION

● Hackacademy   **2019 – 2020**
MERN Stack Development

                                                                                                            2016 - 2023
● Kwara State Polytechnic Ilorin
 Computer Science

● Elefosan School of Science, Ipetu Ijesha, Osun State, Nigeria   **2007 - 2013**

Secondary School Certificate Examination

<u>HOBBIES</u>

1. Creating Content, **2.** Travelling, **3.** Learning Languages, **4.** Keeping in touch with friends, **5.** Reading.
